Preuss Model United Nations announcement to develop "Good Global Citizens": Importance of HIV Testing

"In light of the upcoming World AIDS Day on December 1st, UN AIDS issued a report which emphasizes the importance of scaling up HIV testing worldwide. HIV is a virus only humans can contract which attacks the immune system, possibly leading to acquired immunodeficiency syndrome (AIDS), wherein the body cannot properly deal with infectious organisms or viruses in the body. Testing for this virus can open the door for better treatment of AIDS and allow people with it to live longer lives, but millions of people in some parts of the world do not have access to HIV testing and in other places, it is close to impossible to get tested. In order to end the AIDS epidemic by 2030, as part of the Sustainable Development Goals, it is pertinent for countries to increase HIV testing in order to combat the disease."
